Opinion Poll

Prepared for

THE SUNDAY TIMES

Prepared by Ian McShane
J.6992

Technical Appendix

Technical Appendix

- The results of this opinion poll are based upon a representative sample of 927 eligible Irish voters aged 18 years +.
- As such, the results can be deemed to be accurate to within plus or minus 3.3 percentage points at the 95% confidence level.
- Fieldwork was conducted on an in-home, face-to-face basis over the period 30th October, - 11th November 2015.
- The sample was stratified across constituencies at 125 locations in the country with individuals selected for interview by way of Demographic Quotas (age, gender, socio-economic status) in line with Central Statistics Office (CSO) and market research industry population estimates.

Technical Appendix

- The subsequent survey results are weighted to reflect the known demographic profile of Irish adults, utilising the most recently published census population estimates from the Central Statistics Office (CSO).
- Party support levels are subsequently realigned in accordance with a technical adjustment factor, designed to smooth the effects of extreme highs and lows in support levels for individual parties as measured at a single point in time, and taking variable election day turnout levels into account.
- All aspects of the survey, including the Party Support adjustment factor, are implemented in accordance with the technical and ethical guidelines set down by the Association of Irish Market Research Organisations (AIMRO) and the European Society of Opinion & Market Research (ESOMAR).

Q.7

If there was a General Election tomorrow, to which party or independent candidate would you give your first preference vote?

Party Support Adjustment Factor: Technical Note

- Predicting election results on the basis of poll data is not an exact science. All the evidence shows that support for individual parties can swing dramatically in the period between elections- very often outside the bounds of historic election results.
- What to do in these circumstances? Most polling companies in Britain and Ireland publish their raw survey results as an index of fluctuations in the emotional mood of voters. They also build in an adjustment based on a number of factors. Where we have reports of how people voted in the last general election as well as how they intend to vote in the next one we can use these data to model the likely level of swing from the last election results.
- We then add back in the forecasts of voters who have not voted last time or do not answer that particular question.
- Finally we take into account each individuals stated likelihood of voting in a forthcoming General Election.
- This is the basis of the adjusted voting forecast in Behaviour & Attitudes polls.

Sunday Times/Behaviour & Attitudes Opinion Poll Series

Background

Fieldwork for last month's Behaviour & Attitudes/Sunday Times Poll was conducted, in the main, before Budget Day.

By all accounts, it was the first budget in many years that could have been described as a 'give-a-bit-away' budget, designed to boost Government Party support levels in advance of next February's General Election.

If anything, the Government PR campaign waged since the announcement of the Budget itself has been even more impressive, with daily announcements of new jobs, affordable rent initiatives, and infrastructural developments throughout the course of the fieldwork period for today's poll.

The message from the Government is clear – while we as a nation neither expect nor want to return to the heady days of the Celtic Tiger, this Government has steered a steady course through the mire created by the last Government, and has set the country on course for a sustainable recovery and better life for all.

While this may or may not be a true reflection of reality, it is the case that a quite consistent 25% or so of the electorate has registered its support/appreciation of Fine Gael over the last 18 months, with circa 8% on average indicating support for the Labour Party.

Sunday Times/Behaviour & Attitudes Opinion Poll Series

Background

While these Government Party support levels peak and trough from wave to wave, they rarely vary from the statistical margin of error for polls of this nature, and would suggest to us that there is a ceiling of support that the combined coalition parties can reach on election day, but are unlikely to exceed.

While it is true that Fine Gael support in particular may receive a final, most probably modest, lift in support in January when voters see the effects of the budget in their pay cheques, it could be argued that the die is cast by this stage, and a return of the existing Fine Gael/Labour administration is most unlikely.

Meanwhile, support for both Fianna Fáil and Sinn Féin has also been reasonably consistent over the last 18 months; settling in at around 19% to 20% apiece.

One of the imponderables thus far has been the likely size and profile of the Independent/Other candidate bloc. We now have three waves of polling data which breaks out the likely make up of the Independent/Other cohort, and this now allows us make more in-depth observations as to which of the main parties the Independents are likely to grant their support to in the post-Election scenario.

Party Support and Leader Satisfaction Levels

In today's Poll, satisfaction with the manner in which the Government is running the country stands at 28% - a month-on-month drop of five points, albeit only marginally below the average satisfaction rating of 30% registered over the 12 months prior to today.

Satisfaction with Enda Kenny as Taoiseach, Joan Burton as Tanaiste and indeed Eamon Ryan as leader of the Green Party remain broadly on a par with each other – settling in at between 31% and 34%.

Meanwhile, Micheál Martin's personal satisfaction rating remains the highest of all party leaders at 39%, and it must be frustrating for him not to have converted this feeling to more solid support for the Fianna Fáil party itself.

While based on relatively small sub-sample sizes, it is worth noting that support for the manner in which the Government is running the country has dropped this month amongst supporters of both Fine Gael and Labour, suggesting perhaps that the recent strains between the coalition partners in agreeing on issues such as rent certainty may be beginning to take their toll.

Support for Enda Kenny amongst Fine Gael supporters (81%) and Joan Burton amongst Labour Party supporters (74%) is solid, although the notion of either of these parties jettisoning their leaders so close to an election is absurd.

Sunday Times/Behaviour & Attitudes Opinion Poll Series

Party Support and Leader Satisfaction Levels

The same applies to Micheál Martin and Gerry Adams, with any leadership scuffles now likely consigned to the early days of March, 2016.

With regard to party support, Fine Gael has indeed received a modest post-budget lift, from 24% to 26%, although this is statistically insignificant. This uplift in Fine Gael support is most pronounced amongst male voters, and those aged 35 years plus, white collar and professional ABC1 individuals, and people living in rural areas who are still feeling the brunt of the recession more acutely than urban dwellers.

Meanwhile, Labour Party support remains in or around its 12 month average of 8%, down one point on last month's poll to 7% today. Its support in today's poll is very heavily skewed towards urban voters, and sits on 9% in the Dublin area, leaving them with a fighting chance in some of the larger constituencies across the capital.

Sinn Féin and Fianna Fáil remain neck-and-neck, registering 21% and 20% support respectively.

The two main opposition parties appeal to quite different demographic groupings, however, with Fianna Fáil support peaking at 33% of the over 55's, and Sinn Féin support receiving a similar 33% support level amongst the 18-34 year olds.

Sunday Times/Behaviour & Attitudes Opinion Poll Series

Party Support and Leader Satisfaction Levels

Crucially, however, support for Sinn Féin stands at 20% in Dublin compared to just 14% for Fianna Fáil, a dynamic which would prove crucial in the maximisation of seats come election day, if it was sustained.

Further proof that Dublin is likely to represent the cockpit of the next election can be gleaned from the 34% support that Independents/Others currently attract in the area.

With the Independents/Other bloc appearing to split roughly 2:1 towards left-leaning candidates, the indications at this stage are that a majority (however slim) of voters in Dublin will opt for left thinking candidates or parties in February.

If we take the results of today's poll and attempt to extrapolate to likely number of seats won in the next Dáil, it proves nigh on impossible to predict the likely composition of the next Government.

Indeed, of the main parties, the only combination which could currently come close to forming an administration would be a Fine Gael/Fianna Fáil one.

Alternatively, a 'Super Republican' coalition of Fianna Fáil and Sinn Féin could come close to making up the numbers, however unlikely that may be.

Party Support and Leader Satisfaction Levels

Certainly, Fine Gael and Labour would both need to make significant grounds if they are to exceed the 50 to 55 seats they would achieve if there was an election tomorrow – a long way away from the required majority of 80 TDs.

We do have more clarity on the different groupings the Independents/Others support base represents, and a combination of the Anti Austerity Alliance, Socialist Party and People Before Profit Alliance could garner around 20 seats between them, positioning them as likely kingpins in next Spring's negotiations!
