# Technical Appendix

## Sample Size

The results of this opinion poll are based upon a representative sample of 921 eligible Irish voters aged 18 years+.

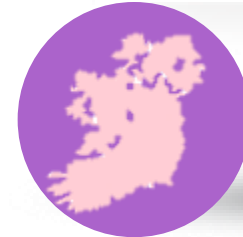

## Fieldwork

As such, the results can be deemed to be accurate to within plus or minus 3.3 percentage points at the 95% confidence level. Fieldwork was conducted on an in-home, face-to-face basis over the period Friday, 17<sup>th</sup> – Tuesday 28<sup>th</sup> July, 2020.

## Location

The sample was stratified across all constituencies at 125 locations in the country with individuals selected for interview by way of Demographic Quotas (age, gender, socio-economic status) in line with Central Statistics Office (CSO) and market research industry population estimates.

## Weighting

The subsequent survey results are weighted to reflect the known demographic profile of Irish adults, utilising the most recently published census population estimates from the Central Statistics Office (CSO).

## Party Support

Party support levels are subsequently realigned in accordance with a technical adjustment factor, designed to smooth the effects of extreme highs and lows in support levels for individual parties as measured at a single point in time, and taking variable election day turnout levels into account.

## Guidelines

All aspects of the survey, including the Party Support adjustment factor, are implemented in accordance with the technical and ethical guidelines set down by the Association of Irish Market Research Organisations (AIMRO) and the European Society of Opinion & Market Research (ESOMAR).

# Party Support Adjustment Factor: Technical Note

- Predicting election results on the basis of poll data is not an exact science. All the evidence shows that support for individual parties can swing dramatically in the period between elections- very often outside the bounds of historic election results.
- What to do in these circumstances? Most polling companies in Britain and Ireland publish their raw survey results as an index of fluctuations in the emotional mood of voters. They also build in an adjustment based on a number of factors. Where we have reports of how people voted in the last general election as well as how they intend to vote in the next one we can use these data to model the likely level of swing from the last election results.
- We then add back in the forecasts of voters who have not voted last time or do not answer that particular question.
- Finally we take into account each individuals stated likelihood of voting in a forthcoming General Election.
- This is the basis of the adjusted voting forecast in Behaviour & Attitudes polls.

### Adjusted figures based on:

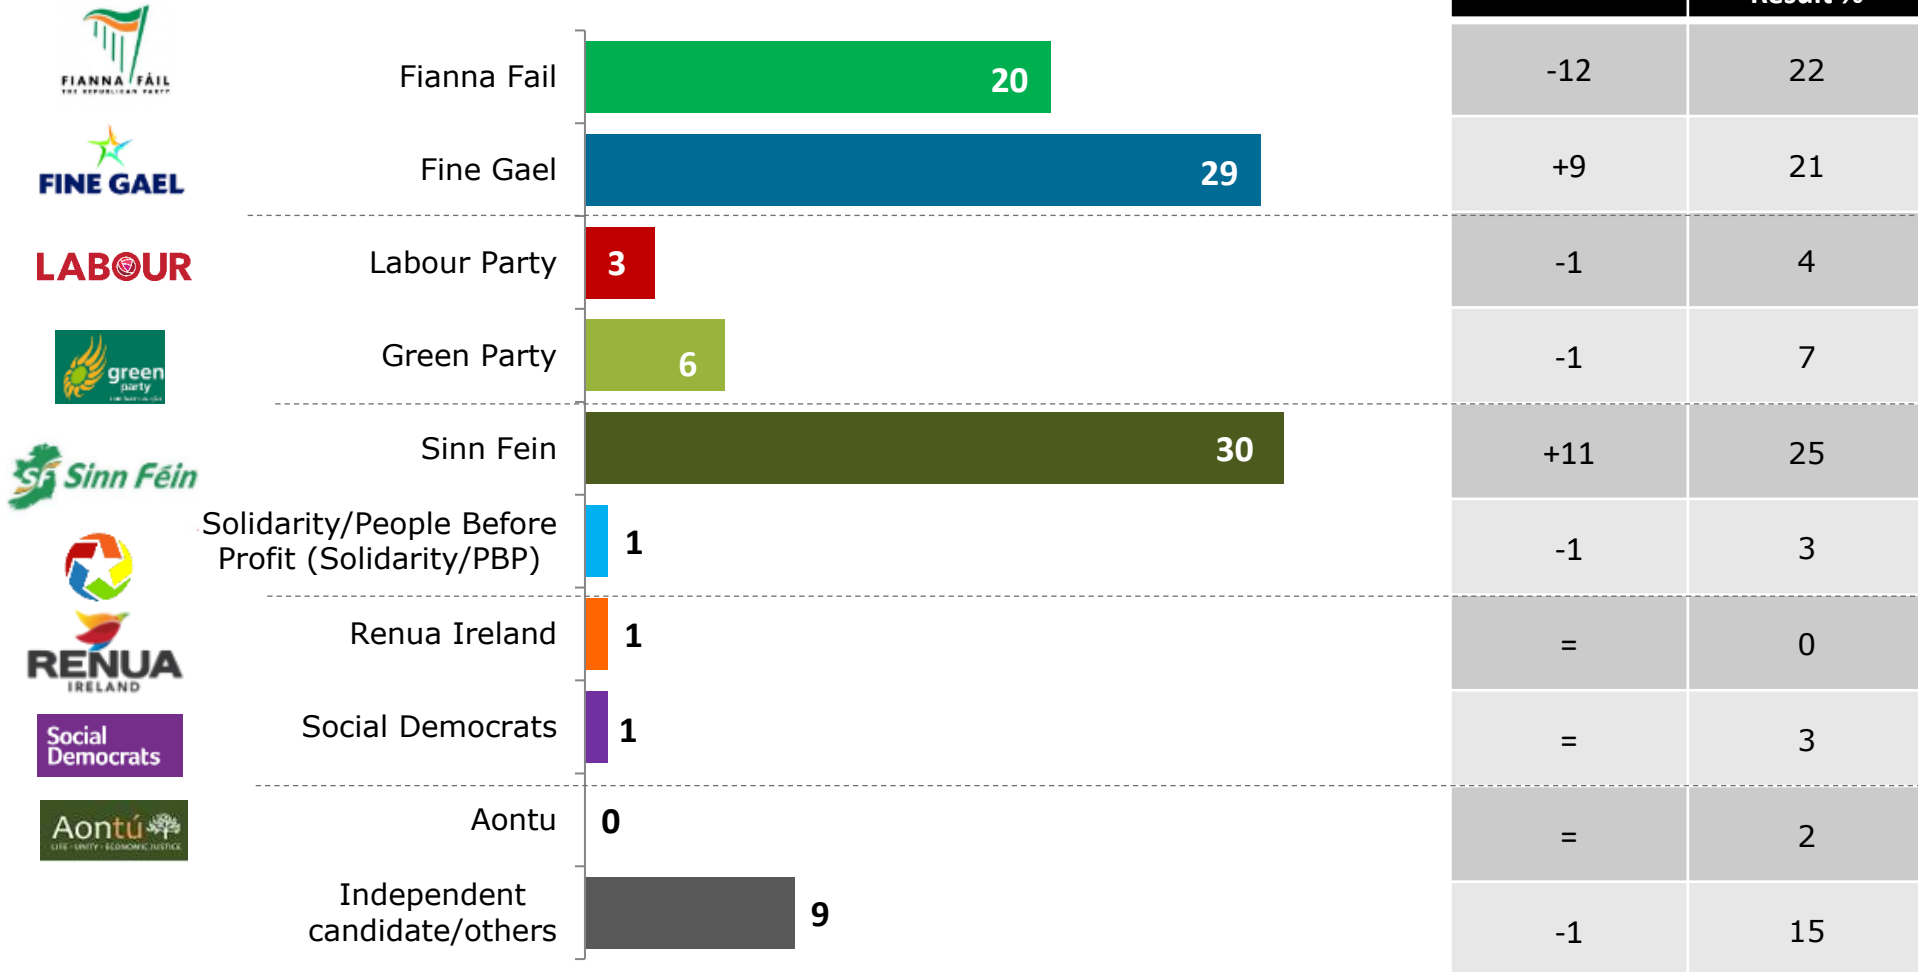

- All who state they would definitely vote
- Weighting of those respondents who give a definite answer as to who they would vote for in a general election and who they voted for in the last election, halfway between stated voting intention and the result of the last election.
- Making no adjustment to stated voting intention of those who do not indicate how they voted in last election.

## Background

Fieldwork for today's poll was conducted over the period Friday 17<sup>th</sup> to Tuesday 28<sup>th</sup> July, 2020. As such, interviewing began just four weeks after Fianna Fáil, Fine Gael and the Green Party reached agreement on its programme for Government.

It is safe to say that the Government's first few weeks in office have been eventful, particularly for Fianna Fáil. The turbulence began with a period of unseemly in-fighting within Fianna Fáil related to ministerial appointments. The fact that these spats were conducted across the airwaves did not reflect well on Fianna Fáil, at a time when the public is seeking selfless leadership during the on-going pandemic crisis.

Within days of these appointments, news of newly appointed Minister for Agriculture Barry Cowen's historical drink driving ban emerged, culminating in his being sacked by Taoiseach, Micheál Martin.

The next controversy related to the publication of a 'green list' of countries that citizens could travel to without having to self-isolate upon their return to Ireland. There was general confusion amongst the public as to precisely whether they should travel to these countries or not, given that the public health advice against all non-essential foreign travel, regardless of whether a country was on the green list or not, remained. Further discord was sown when Tánaiste Leo Varadkar cast doubt on the wisdom of publishing such a green list at all.

The green list controversy went from bad to worse when it was confirmed that those who travelled abroad on holidays from Ireland were liable to have their Pandemic Unemployment Payments reduced. Indeed, media coverage and debate of such PUP reductions partly overshadowed the publication of the Government's comprehensive plan for re-opening schools fully by the end of August.

This is the background against which today's poll was conducted, providing us with a meaningful context within which the poll findings can be interpreted.

## Party Support and Leader Satisfaction Levels

Fieldwork for the last comparable Behaviour & Attitudes Sunday Times poll was conducted between Thursday 2<sup>nd</sup> to Tuesday 14<sup>th</sup> January of this year. As such, the general election campaign had yet to gain traction, and Covid-19 was only beginning to emerge as an 'overseas' news story.

In that January poll, support for Fine Gael had dropped by an alarming 7 percentage points since the previous month to an all-time low of just 20%. Sinn Féin support levels were at 19%, which was very much in keeping with its previous 12 month rolling average. Most of Fine Gael's lost support had in fact migrated at that stage to Fianna Fáil, and all of the indications were that Micheál Martin was set to lead his party into a successful election, emerging as Taoiseach as leader of the largest party.

In reality, both Micheál Martin and Leo Varadkar ran poor election campaigns which Sinn Féin capitalised on, the net result being Sinn Féin capturing the greatest share of the popular vote, followed by Fianna Fáil, and then Fine Gael. Indeed, the combined Fianna Fáil/Fine Gael share of the vote stood at just 43%, with the majority of the electorate essentially voting for a change of the old guard for a left of centre alternative.

Sinn Féin's failure to run enough candidates, and the reluctance of both Fianna Fáil and Fine Gael to enter Government with Sinn Féin, resulted of course in the formation of a Fianna Fáil, Fine Gael and Green party administration, which is still very much in its infancy. Today's is therefore the first major opinion poll to capture public sentiment towards the new Government, and the results make interesting reading.

## Party Support and Leader Satisfaction Levels

At an overall level, the Government will be reasonably happy with its very first satisfaction rating of 51%, suggesting that voters are prepared to give the administration a little time to overcome its initial teething problems. Over a third (36%) are expressly dissatisfied with the Government's performance thus far however, a proportion which rises to 40% of those living in the Dublin area.

This is the first time of course that Micheál Martin's popularity as Taoiseach has been measured in any poll and at 44% satisfaction he enters the Taoiseach charts at almost precisely the same level of popularity as Leo Varadkar did in 2017 when his equivalent rating was 43%.

While the vast majority (82%) of Fianna Fáil grassroots supporters are happy with their leader's performance as Taoiseach thus far, just 49% of Fine Gael voters are comfortable with the job Martin is doing, while 37% are not. Although based on a small sub-sample size, initial indications are that Green Party supporters are adopting a wait and see attitude to Micheál Martin, with four in ten of them satisfied with the Taoiseach, three in ten dissatisfied, and three in ten yet to form an opinion either way.

Meanwhile, Mary Lou McDonald's satisfaction rating has reached a historical high of 57%, with Alan Kelly's popularity as leader of the Labour Party registering for the first time at a very comfortable 49%. Straight off his recent narrow victory in the Green Party leadership race, sentiment towards Eamon Ryan is a little more fluid – with 41% happy with the job he is doing as leader of the Green Party, and 43% unhappy.

Of all the party leaders however, it is Leo Varadkar who really stands out from the pack. Almost two-thirds (63%) of the electorate express satisfaction with the job Varadkar is doing as Tánaiste and leader of Fine Gael – reaching an unprecedented 96% of Fine Gael supporters and a still-impressive 82% of all Fianna Fail voters.

## Party Support and Leader Satisfaction Levels

With regard to party support levels, almost six months after the General Election when Sinn Féin emerged as the single largest party in the country, support for the party remains strong, and has in fact increased from its 25% share of the vote in February to 30% support this month. If Sinn Fein was to replicate this performance at the next General Election it would stand to win in the region of 55 seats, assuming of course that the party ran significantly more candidates than it did this year.

In terms of voter sub-groupings, Sinn Féin has gained a strong foothold across all key demographics, with the sole exception of the farming community where Fianna Fáil and Fine Gael attract a combined 80% plus support.

If Sinn Féin is happy with today's poll results, so too will Fine Gael, whose 29% level of support in today's poll represents an 8 percentage point uplift from the 21% share of the vote it garnered in February's election. In effect therefore, we have Sinn Féin on the centre-left, and Fine Gael on the centre right locked on practically identical levels of support, with each vying for pole position.

In fact, if we were to add together today's poll figures for Fianna Fáil, Fine Gael and Renua under a notional 'centre right' banner, and do the same for Sinn Féin, the Green Party, The Labour Party, Solidarity/PBP, the Social Democrats and smaller independent candidates under an equivalent 'centre-left' label of convenience, we currently find ourselves in a situation where precisely 50% of the electorate is leaning right, and 50% left.

This battle between the right and left is one which is playing out in numerous countries across the globe, as the world is convulsed by unprecedented economic and social turmoil. We presumably have a long way to go before the next Irish General Election, and today's poll merely establishes a benchmark for the battle royale that lies ahead of us for the hearts and minds of the Irish people.

## Schools Re-opening

Just last week, the Government unveiled its €375 million roadmap towards the reopening of schools to all pupils at the end of August.

Prior to the details of this plan being published, respondents in this poll were asked whether they agreed or disagreed that the schools should re-open fully after the summer holidays, even if social distancing in the classrooms could not be fully enforced.

In response, twice as many Irish adults (60%) said they agreed that schools should re-open even if social distancing cannot be fully enforced, as said they disagreed (26%). There was slightly greater apprehension around the re-opening of schools in urban areas, perhaps reflecting the fact that urban schools tend to have larger numbers of students on their premises at any one time than rural schools. The proportion of those agreeing the schools should re-open even if social distancing cannot be fully enforced is even higher amongst parents of school children, at 68%. There is no difference in this regard between parents of primary school children and those with secondary school children.

A similar pattern emerges when parents were asked whether they would in fact send their children back to school after the summer holidays, even if social distancing cannot be fully enforced. In fact, less than one in five of all such parents suggested they would be reticent to send their children back in the absence of full social distancing enforcement, and presumably their fears will need to be assuaged by the Department of Education over the coming months regarding the types of protocols that will be implemented to safeguard their children's health.
