

## Sunday Times and Behaviour & Attitudes

July Opinion Poll 2021

Prepared by Ian McShane

J.212859

RESEARCH  
& INSIGHT

# Technical Appendix

# Technical Appendix

## Sample Size

The results of this opinion poll are based upon a representative sample of 894 eligible Irish voters aged 18 years+.

## Fieldwork

As such, the results can be deemed to be accurate to within plus or minus 3.3 percentage points at the 95% confidence level. Fieldwork was conducted on an in-home, face-to-face basis over the period Thursday 1<sup>st</sup> – Tuesday, 13<sup>th</sup> July, 2021.

## Location

The sample was stratified across all constituencies at 125 locations in the country with individuals selected for interview by way of Demographic Quotas (age, gender, socio-economic status) in line with Central Statistics Office (CSO) and market research industry population estimates.

## Weighting

The subsequent survey results are weighted to reflect the known demographic profile of Irish adults, utilising the most recently published census population estimates from the Central Statistics Office (CSO).

## Party Support

Party support levels are subsequently realigned in accordance with a technical adjustment factor, designed to smooth the effects of extreme highs and lows in support levels for individual parties as measured at a single point in time, and taking variable election day turnout levels into account.

## Guidelines

All aspects of the survey, including the Party Support adjustment factor, are implemented in accordance with the technical and ethical guidelines set down by the Association of Irish Market Research Organisations (AIMRO) and the European Society of Opinion & Market Research (ESOMAR).

# Party Support Adjustment Factor: Technical Note

- Predicting election results on the basis of poll data is not an exact science. All the evidence shows that support for individual parties can swing dramatically in the period between elections- very often outside the bounds of historic election results.
- What to do in these circumstances? Most polling companies in Britain and Ireland publish their raw survey results as an index of fluctuations in the emotional mood of voters. They also build in an adjustment based on a number of factors. Where we have reports of how people voted in the last general election as well as how they intend to vote in the next one we can use these data to model the likely level of swing from the last election results.
- We then add back in the forecasts of voters who have not voted last time or do not answer that particular question.
- Finally we take into account each individuals stated likelihood of voting in a forthcoming General Election.
- This is the basis of the adjusted voting forecast in Behaviour & Attitudes polls.

### Adjusted figures based on:

- All who state they would definitely vote
- Weighting of those respondents who give a definite answer as to who they would vote for in a general election and who they voted for in the last election, a quarter of the way between stated voting intention and the result of the last election.
- Making no adjustment to stated voting intention of those who do not indicate how they voted in last election.

Q.9a Do you or do you not have confidence in Nphet's advice to Government on the level of public health restrictions needed to meet the threat of the coronavirus?  
 Q.9b Do you think the Nphet team has given sound and reliable advice to Government throughout this pandemic, or not?

# Commentary

## Background

Fieldwork for today's Sunday Times/Behaviour & Attitudes poll was conducted over the period Thursday 1<sup>st</sup> to Tuesday, 13<sup>th</sup> July, 2021.

As such, some fieldwork would have been conducted following the results of the Dublin Bay South By-Election in which Labour performed exceptionally well, and Fianna Fáil historically badly.

At a broader national level, while the vaccination rollout has been proceeding well, the political narrative has in recent weeks switched to the Government's management of the re-opening of the indoor hospitality sector.

With the reopening of indoor dining complicated by Nphet's recent advice that only fully vaccinated people should be allowed dine indoors, concerns around the inequitable treatment of the unvaccinated versus the vaccinated have been raised in various quarters, leaving the Government in something of a dilemma as to how to balance the practicalities of real life with public health considerations.

The situation has been compounded by confusion around the use of the EU digital certificate as a means of gaining access to indoor dining, and indeed whether GPs could or should be responsible for issuing certification of having recovered from Covid upon request.

The opposition parties, and Sinn Féin in particular, have made hay of this general sense of uncertainty, and this is the context within which today's poll was conducted.

## Party Support and Leader Satisfaction Levels

As of July 2021, the country is evenly split between those who are satisfied with the manner in which the Government is running the country (46%), and those who are dissatisfied (45%).

Indeed, this schism is reflected in party support levels, whereby exactly 50% of the electorate would vote for one of the three Government Parties in the event of a general election, with 50% opting for the opposition.

The key determinant of Government satisfaction is age – with 54% of those aged 55 years+ happy with the Government's performance compared to 37% who are unhappy. Conversely, 53% of those aged 35 – 54 years are dissatisfied with the Government, and 39% satisfied. The view of 18 to 34 year old voters is evenly split in this regard.

With regard to party leader popularity, satisfaction with Micheál Martin as Taoiseach has dropped significantly from 50% in June to 45% this month, with this dip most precipitous amongst males (-7 points), 18-34 year olds (-7), those from a farming (-11) and white collar working background (-6), and in the Dublin area where support for the Taoiseach has dropped from 51% last month to just 39% today.

Leo Varadkar, Mary Lou McDonald and Eamon Ryan's popularity has also declined over the last four weeks, although not statistically significantly.

As mentioned, the combined support of Fianna Fáil, Fine Gael and the Green Party in this month's poll stands at precisely 50%, with support for Sinn Féin, the Labour Party, Independents, Solidarity/PBP, Social Democrats and Aontú summing to a corresponding 50%.

## Party Support and Leader Satisfaction Levels

Compared to last month, support for Sinn Féin has declined four points from what was an exceptionally high 34%, and that party still leads the field over both Fine Gael and Fianna Fáil as the single most popular party in the country.

While based on a relatively low starting point, the Green Party will be happy enough to have settled in at around 5% support, as will the Labour Party which has edged up to the same level of support nationwide.

Support for the Labour Party peaks amongst male voters (at 7% support), ABC1 white collar and professional workers (8%), and in the Leinster region excluding Dublin (13%). Support for the Green Party, meanwhile, is highest again amongst ABC1s (7%), and also in Dublin where it currently commands 8% support – on a par with Fianna Fáil's 8% share of the vote in the capital.

## Confidence in Nphet Advice

A majority, albeit by no means an overwhelming one, of Irish voters expressed confidence in Nphet's advice to Government on the level of public health restrictions needed to meet the threat of the coronavirus.

Just over a third (34%) do not have confidence in Nphet's advice, with a further 8% uncertain in this regard. Levels of confidence in Nphet are broadly similar across the different demographic groupings, while there is a stark divide between supporters of Fianna Fáil, Fine Gael, Labour and the Green Party, a majority of whom express confidence, and supporters of Sinn Féin, Independents, and the undecided, half of whom express either no confidence in Nphet, or are undecided on the matter.

A similar pattern of response emerges when people are asked whether they feel the Nphet team has given sound and reliable advice to Government throughout the pandemic or not. Here, 62% believe reliable advice has been consistently provided to Government, 29% feel it has not, with 9% uncertain.

As we enter a couple of fraught months as the Delta variant takes a grip across the nation, it will be particularly important that Nphet and the Government work together to assuage the fears and concerns of a significant proportion of the populous around the reliability and veracity of public health advice being dispensed.
