September Opinion Poll 2022

Prepared by Luke Reaper

J.223928

RESEARCH
& INSIGHT

Technical Appendix

Technical Appendix

Sample Size

The results of this opinion poll are based upon a representative sample of 905 eligible Irish voters aged 18 years+.

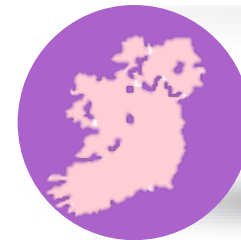

Fieldwork

As such, the results can be deemed to be accurate to within plus or minus 3.3 percentage points at the 95% confidence level. Fieldwork was conducted on an in-home, face-to-face basis over the period 25th August – 6th September 2022.

Location

The sample was stratified across all constituencies at 125 locations in the country with individuals selected for interview by way of Demographic Quotas (age, gender, socio-economic status) in line with Central Statistics Office (CSO) and market research industry population estimates.

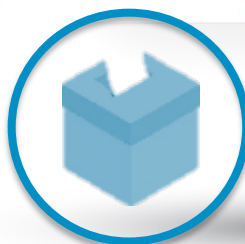

Weighting

The subsequent survey results are weighted to reflect the known demographic profile of Irish adults, utilising the most recently published census population estimates from the Central Statistics Office (CSO).

Party Support

Party support levels are subsequently realigned in accordance with a technical adjustment factor, designed to smooth the effects of extreme highs and lows in support levels for individual parties as measured at a single point in time, and taking variable election day turnout levels into account.

Guidelines

All aspects of the survey, including the Party Support adjustment factor, are implemented in accordance with the technical and ethical guidelines set down by the Association of Irish Market Research Organisations (AIMRO) and the European Society of Opinion & Market Research (ESOMAR).

Party Support Adjustment Factor: Technical Note

- Predicting election results on the basis of poll data is not an exact science. All the evidence shows that support for individual parties can swing dramatically in the period between elections- very often outside the bounds of historic election results.
- What to do in these circumstances? Most polling companies in Britain and Ireland publish their raw survey results as an index of fluctuations in the emotional mood of voters. They also build in an adjustment based on a number of factors. Where we have reports of how people voted in the last general election as well as how they intend to vote in the next one we can use these data to model the likely level of swing from the last election results.
- We then add back in the forecasts of voters who have not voted last time or do not answer that particular question.
- Finally we take into account each individuals stated likelihood of voting in a forthcoming General Election.
- This is the basis of the adjusted voting forecast in Behaviour & Attitudes polls.

Adjusted figures based on:

- All who state they would definitely vote
- Weighting of those respondents who give a definite answer as to who they would vote for in a general election and who they voted for in the last election, a quarter of the way between stated voting intention and the result of the last election.
- Making no adjustment to stated voting intention of those who do not indicate how they voted in last election.

Commentary

Background

- The fieldwork for this latest Sunday Times/Behaviour & Attitudes Poll was conducted 25th August – 6th September, 2022. We like to term it the ‘back-to-school’ poll!
- Inflationary pressures, particularly centring on significant energy prices rises, dominated the media headlines. There was also talk of the European Central Bank (ECB) potentially opting for another aggressive interest rate hike during the Autumn.
- Such negative chatter has not dented the surge in residential property prices, with reports during this period of a 14.1% increase in the year to June, resulting in the residential property price index now at similar levels to its peak in April 2007.
- Despite these inflationary pressures, the unemployment numbers from the CSO point to a strong jobs market. Unemployment remains at two-decade low of about 4%, despite lifting marginally in August.
- Much discussion abounded regarding how to protect the most vulnerable in Budget 2023. Social Justice Ireland were active in championing €20 weekly increases in all core social welfare payments, with other groups also putting forward their causes and positions.

Background

- The housing challenge was also impacting Ukrainian refugees, with the return to the education term time necessitating their move from some student accommodation.
- Politically, Fianna Fáil's Robert Troy got into 'housing' hot water and resigned, with many others also looking at their filing. Across the water over this period it was becoming clear that Liz Truss would be the new PM, and she assumed this position as we exited the polling period.
- And not surprisingly, the reporting of Covid-19 related deaths hitting a five-month high in August went fairly unnoticed.

Government and Leader Satisfaction Levels

- Government satisfaction stands at 36% of the population satisfied with its performance (three percentage points down on our July poll, and an eight point decline since May). It is the third wave of decline. Over half (57%) are dissatisfied with the current Government. Satisfaction levels with the Government remains higher amongst older (55+) voters. Note the Government in recent years has taken a hit in September polling period.
- Mary Lou McDonald's satisfaction rating has slipped slightly from 49% to 47% (five percentage points down on her May/June high). Despite this, she holds onto the most popular leader title, by a slim margin.
- Micheál Martin's satisfaction rating drops one percentage point (not significant) to 46% (down from his 53% high in May).
- Leo Varadkar's satisfaction level has increased by one point (not significant) from 39% last wave to 40%. He is now four percentage points lower on his May/June 44% high.
- Eamon Ryan's satisfaction rating remains the same as July at 26%. He too has suffered a longer term decline - five percentage points in his case since June 2022.
- Ivana Bacik rating has slipped slightly from 46% to a 43% satisfaction rating.
- Most party leaders for the second poll have taken a hit, as people continue to be concerned regarding the surge in the cost-of-living.

Party Support and Leader Satisfaction Levels

- Sinn Féin's support stands at 35% (down one percentage point). They consistently have remained the most popular party this year.
- Fine Gael has seen a drop of one percentage point from 21% to 20% (not significant). Fianna Fáil stand at 24% (an increase of three percentage points). Labour take a two point hit dropping to 4%. The Green Party maintain their 5% level of support.
- The Social Democrats are at 3% support, their highest level since October 2021.
- No easy solution appears to exist to the inflationary crisis across Europe. With rising energy prices in the 30 percent range, and more signalled to be on the way, it is not surprising that politicians around the world are trying to devise solutions on how to tackle this latest crisis. Winter is certainly coming, and if the rumours are correct – the Christmas lights might even go out, surely not!
- One thing is certain, we are certainly being warmed-up for a significant 'cost-of-living' package in the budget.

Tabular Data

Q.1 Would you say you are satisfied or dissatisfied with the manner in which the Government is running the country?
