Technical Appendix

Technical Appendix

Sample Size

The results of this opinion poll are based upon a representative sample of 923 eligible Irish voters aged 18 years+.

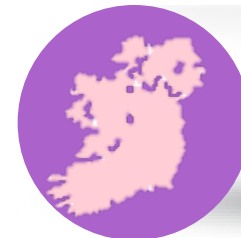

Fieldwork

As such, the results can be deemed to be accurate to within plus or minus 3.3 percentage points at the 95% confidence level. Fieldwork was conducted on an in-home, face-to-face basis over the period 27th October – 8th November 2022.

Location

The sample was stratified across all constituencies at 125 locations in the country with individuals selected for interview by way of Demographic Quotas (age, gender, socio-economic status) in line with Central Statistics Office (CSO) and market research industry population estimates.

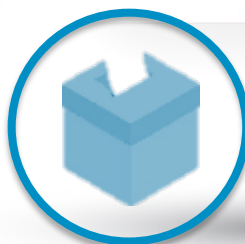

Weighting

The subsequent survey results are weighted to reflect the known demographic profile of Irish adults, utilising the most recently published census population estimates from the Central Statistics Office (CSO).

Party Support

Party support levels are subsequently realigned in accordance with a technical adjustment factor, designed to smooth the effects of extreme highs and lows in support levels for individual parties as measured at a single point in time, and taking variable election day turnout levels into account.

Guidelines

All aspects of the survey, including the Party Support adjustment factor, are implemented in accordance with the technical and ethical guidelines set down by the Association of Irish Market Research Organisations (AIMRO) and the European Society of Opinion & Market Research (ESOMAR).

Party Support Adjustment Factor: Technical Note

- Predicting election results on the basis of poll data is not an exact science. All the evidence shows that support for individual parties can swing dramatically in the period between elections- very often outside the bounds of historic election results.
- What to do in these circumstances? Most polling companies in Britain and Ireland publish their raw survey results as an index of fluctuations in the emotional mood of voters. They also build in an adjustment based on a number of factors. Where we have reports of how people voted in the last general election as well as how they intend to vote in the next one we can use these data to model the likely level of swing from the last election results.
- We then add back in the forecasts of voters who have not voted last time or do not answer that particular question.
- Finally we take into account each individuals stated likelihood of voting in a forthcoming General Election.
- This is the basis of the adjusted voting forecast in Behaviour & Attitudes polls.

Adjusted figures based on:

- All who state they would definitely vote
- Weighting of those respondents who give a definite answer as to who they would vote for in a general election and who they voted for in the last election, a quarter of the way between stated voting intention and the result of the last election.
- Making no adjustment to stated voting intention of those who do not indicate how they voted in last election.

Commentary

Background

- The fieldwork for this latest Sunday Times/Behaviour & Attitudes Poll was conducted between 27th October – 8th November, 2022.
- The background to this poll was inflationary concerns still dominating the discourse as the cost of living crisis continued. The tech sector started to shed jobs, with Stripe and Twitter leading the way. At the same time the ESRI was reporting that a job no longer protects against poverty.
- The European Central Bank raised interest rates for the third meeting in a row, to place further pressure on mortgage holders.
- Elsewhere, Sunak became the third British PM this year. However, attempts to restore the Stormont executive floundered, as did the calling of the Election.
- A few political spats emerged across the parties, from Mr Ó Broin rowing back on the Civil servant comments, to Marc MacSharry resigning from Fianna Fáil over Taoiseach's response to the bullying allegation. Mr Varadkar got drawn into not guaranteeing homes for Ukrainian refugees.
- On a positive note some 638,000 families received a double child benefit payment of €280 during this poll timeline. Also the first utility credit was dispensed to help ease the burden of increased prices.

Government and Leader Satisfaction Levels

- Current Government satisfaction now stands at 43% of the population satisfied with its performance (an increase of 1% point on October, but 7% points up on September). Half (50%) are dissatisfied with the current Government (down seven percentage points on September). Satisfaction levels with the Government remains higher amongst older (55+) voters.
- Micheál Martin's satisfaction rating also increased by three percentage points to 51% and he is now the most popular leader in the country.
- Mary Lou McDonald's satisfaction rating is stable at 49%.
- Leo Varadkar's satisfaction level is stable at 42%.
- Eamon Ryan's satisfaction rating has dropped 1% point (not significant) from 31% to 30%.
- Ivana Bacik's rating dropped back from 47% to 44%.

Party Support and Leader Satisfaction Levels

- Sinn Féin's support remains at 34% and they remain the most popular party.
- Fianna Fáil's support increased by 1% point to 23% (not significant).
- Fine Gael remained steady on 21%.
- Labour drop one percentage point to 5%.
- The Green Party remain on 4%.
- The Social Democrats have 2% support.
- The various party spats and outbursts do not seem to have impacted these poll results. Undoubtedly people are more focused on their own lives and coping with the inflationary times. The fuel and child allowances will be gratefully received, but the real stress-test will come when the post Christmas 'presents' and fuel bills hit.
- And finally Mary Lou McDonald used her keynote speech at the party's Ard Fheis in Dublin to call for a Sinn Féin-led government. Certainly a Governmental positioning is emerging.

Special questions this wave

- This wave we focused on Northern Ireland.
- Almost 3 in 5 (57%) indicate interest levels in the history of the Troubles in Northern Ireland. The level of interest is significantly lower amongst younger voters aged 18-34 years (47%).
- A high proportion (58%) claim to fully understand the history of the Troubles, However this again is lower amongst 18-34s (42%).
- One in three (31%) think it is socially acceptable to say 'up the ra' – significantly higher amongst those in Conn/Ulster (48%) and amongst Sinn Fein supporters (47%).
- 80% support the Good Friday Agreement. However, significantly higher support exists amongst those aged 55+ (86%), with one quarter (26%) of these under 35 having no opinion or simply do not know whether they support it, or not.
- Reaction to Michelle O'Neill's statement – 1 in 3 (31%) agree with Michelle O'Neill's comment (there was no alternative to 'violent British rule' during the Troubles), 41% felt there was always an alternative (especially middle-class voters). However, 28% don't know/had no opinion (38% amongst younger voters aged 18-34 years).
- The results indicate some detachment amongst younger voters around Northern Ireland and perhaps less of an understanding of the history.
