March Opinion Poll 23

J. 234379

Prepared by:
Luke Reaper

B&A

THE SUNDAY TIMES

Technical Appendix

B&A

Sample Size

The results of this opinion poll are based upon a representative sample of 943 eligible Irish voters aged 18 years+.

Fieldwork

As such, the results can be deemed to be accurate to within plus or minus 3.3 percentage points at the 95% confidence level. Fieldwork was conducted on an in-home, face-to-face basis over the period 4th and 14th March 2023.

Location

The sample was stratified across all constituencies at 125 locations in the country with individuals selected for interview by way of Demographic Quotas (age, gender, socio-economic status) in line with Central Statistics Office (CSO) and market research industry population estimates.

Weighting

The subsequent survey results are weighted to reflect the known demographic profile of Irish adults, utilising the most recently published census population estimates from the Central Statistics Office (CSO).

Party Support

Party support levels are subsequently realigned in accordance with a technical adjustment factor, designed to smooth the effects of extreme highs and lows in support levels for individual parties as measured at a single point in time, and taking variable election day turnout levels into account.

Guidelines

All aspects of the survey, including the Party Support adjustment factor, are implemented in accordance with the technical and ethical guidelines set down by the Association of Irish Market Research Organisations (AIMRO) and the European Society of Opinion & Market Research (ESOMAR).

Party Support Adjustment Factor: Technical Note

- Predicting election results on the basis of poll data is not an exact science. All the evidence shows that support for individual parties can swing dramatically in the period between elections- very often outside the bounds of historic election results.
- What to do in these circumstances? Most polling companies in Britain and Ireland publish their raw survey results as an index of fluctuations in the emotional mood of voters. They also build in an adjustment based on a number of factors. Where we have reports of how people voted in the last general election as well as how they intend to vote in the next one we can use these data to model the likely level of swing from the last election results.
- We then add back in the forecasts of voters who have not voted last time or do not answer that particular question.
- Finally we take into account each individuals stated likelihood of voting in a forthcoming General Election.
- This is the basis of the adjusted voting forecast in Behaviour & Attitudes polls.

Commentary

B&A

Background

This Sunday Times/ Behaviour & Attitudes (B&A) poll was conducted between 4th and 14th March 2023.

In the run up to the poll, some positive news emerged with the Windsor Agreement announced which signalled a breakthrough on the Northern Ireland Protocol.

However, the Housing challenge remained a prominent issue, with heated debate on the issue. In the run up to the poll the new Social Democrats leader, Holly Cairns, set her stall out with her first Dáil contribution- *“I’m a member of the first-ever generation who will be worse off than our parents. This didn’t happen by accident”*. The pain for mortgage holders continued to intensify as interest rates continued to rise and more ECB hikes being signalled. The eviction ban was lifted with much debate and rancour across the political divide.

As Arctic weather arrived, large energy bills continued to hit households, with reports of declining wholesale prices yet no reductions for consumers causing discontent.

At the same time high food prices were impacting shopper behaviour, with frugal methods being employed in an attempt to cope. What is clear is that some cohorts of our society are under severe pressure and in survival mode, whereas others can weather this storm much more easily.

Background

The Tech industry wobble was still being felt with PayPal announcing a cut of 62 Irish jobs and the sale of its Irish offices in Dundalk and Dublin. Despite the Tech job cuts (and Meta announced more as we left field), the level of employment remains at a historic high. Thus, it is clear that the low unemployment rate is the saviour in these challenging times. If this were to be dented, then we would be faced with a different scenario.

Also, we had a blast from the past, with global bank stocks dropping prompted by the collapse of the Silicon Valley Bank. Prior to its collapse the Silicon Valley Bank was the 16th largest bank in the US. To avoid widespread contagion the US government quickly guaranteed all deposits of the banks customers. The question on everyone's mind is whether rising interest rates combined with potential over-exposure to falling bond prices could impact other financial institutions.

Due to uncertainty about the future and what is around the corner people are trying to seize the moment. Hence it is not surprising that passenger traffic at Dublin Airport has exceeded pre-pandemic levels. It seems that many of us are in need the holiday antidote.

Party Support Levels

- Sinn Féin's support increases by one percentage point to 32% and they are consistently the most popular party. Sinn Féin support is particularly strong amongst those aged 18-34 years, where 45% would give them a first preference vote. However, the Sinn Féin vote is strong across the full age spectrum up to 55 years.
- Their support is also high amongst those in both Dublin (29%) and those living outside Dublin (33%), and among both urban (33%) and rural voters (30%). While their blue-collar heartland (C2DE) is not a surprise (40%), one quarter (26%) of more middle-class voters support them, which places them second only to Fine Gael (28%) amongst this cohort.
- Fine Gael has maintained its uplift in support recorded in February and stands at 23%.
- However, Fianna Fáil support has taken a hit this wave with a four percentage point decline from 24% in February to 20% in March. The focus on housing is likely to have impacted here. Their heartland is those aged 55+ years – which is a challenge for the party.
- Labour and the Green Party remain steady at 5% each.
- Independents' support levels have also remained stable at 9%.

Party Support Levels

- The left leaning parties have benefitted most with the Social Democrat support growing two percentage points to 4%, while Solidarity/PBP register a 1% increase, bringing their support to 2%. It is interesting that the Social Democrat's increase in support has come across the 18-54 year old cohort and across the socio-economic divide, albeit their support is stronger amongst more middle-class voters (7% ABC1) compared to more working-class cohorts (3% C2DE).
- Undoubtedly the new Social Democrat leader, Holly Kearns, has raised the profile of the Social Democrats but it remains to be seen whether this level of support can be held or even increased. If this momentum were to be maintained, they could be an interesting player in the months ahead.
- Overall, total Government support has decreased by four percentage points from 52% to 48% probably not surprising, given the month that was in it.
