

The Sunday Times and Behaviour & Attitudes

September Opinion Poll 2023

J. 234996

Prepared by:
Luke Reaper

B&A

THE SUNDAY TIMES

Technical Appendix

B&A

Sample Size

The results of this opinion poll are based upon a representative sample of 910 eligible Irish voters aged 18 years+.

Fieldwork

As such, the results can be deemed to be accurate to within plus or minus 3.3 percentage points at the 95% confidence level. Fieldwork was conducted on an in-home, face-to-face basis over the period 31st August – 12th September 2023.

Location

The sample was stratified across all constituencies at 125 locations in the country with individuals selected for interview by way of Demographic Quotas (age, gender, socio-economic status) in line with Central Statistics Office (CSO) and market research industry population estimates.

Weighting

The subsequent survey results are weighted to reflect the known demographic profile of Irish adults, utilising the most recently published census population estimates from the Central Statistics Office (CSO).

Party Support

Party support levels are subsequently realigned in accordance with a technical adjustment factor, designed to smooth the effects of extreme highs and lows in support levels for individual parties as measured at a single point in time, and taking variable election day turnout levels into account.

Guidelines

All aspects of the survey, including the Party Support adjustment factor, are implemented in accordance with the technical and ethical guidelines set down by the Association of Irish Market Research Organisations (AIMRO) and the European Society of Opinion & Market Research (ESOMAR).

Party Support Adjustment Factor: Technical Note

- Predicting election results on the basis of poll data is not an exact science. All the evidence shows that support for individual parties can swing dramatically in the period between elections- very often outside the bounds of historic election results.
- What to do in these circumstances? Most polling companies in Britain and Ireland publish their raw survey results as an index of fluctuations in the emotional mood of voters. They also build in an adjustment based on a number of factors. Where we have reports of how people voted in the last general election as well as how they intend to vote in the next one we can use these data to model the likely level of swing from the last election results.
- We then add back in the forecasts of voters who have not voted last time or do not answer that particular question.
- Finally, we take into account each individuals stated likelihood of voting in a forthcoming General Election.
- This is the basis of the adjusted voting forecast in Behaviour & Attitudes polls.

Sunday Times/Behaviour & Attitudes Opinion Poll Series

Background

- The fieldwork for this Sunday Times/Behaviour & Attitudes poll was conducted between 31st August to 12th September 2023, during the 'back-to-school' period.
- With that back-to-school time often comes better weather, which was once again the case in recent weeks. There was also the positive distraction in the lead up to the Rugby World Cup, with hopes of Irish success.
- High profile reports of assaults in the media –Stephen Termini notable- resulting in crime appearing on the radar as a societal priority more than we have seen in recent times. However, Housing and the general cost of living remained the key topic of conversation.
- During this period rising inflation was once again being reported, coupled with increased back-to-school costs. While interest rates for mortgages and food prices remained high, there was some positive news around energy prices. A series of announcements from different energy suppliers of reduced energy costs was welcomed. While this will provide some much needed respite in the Winter, prices in general are still high and we could be facing another winter of discontent, with an additional interest rate rise adding to the pressure. It is likely that the upcoming budget will be must-watch viewing in October, which might at least bolster RTE viewing figures.

Sunday Times/Behaviour & Attitudes Opinion Poll Series

Government and Leader Satisfaction Levels

- The satisfaction levels with the Government have been pretty consistent over recent months (apart from the June high of 39%) with 34% of the electorate satisfied with the Government performance. The drop from 41% post the eviction ban lifting has not really been consistently recovered.
- Those dissatisfied with the Government have increased to 59% (+5%pts). Those aged 35-54 and those living in Conn/Ulster show higher levels of dissatisfaction.
- The individual party leader satisfaction rating changes:
 - Micheál Martin has seen a dip of three percentage points to 44% satisfaction.
 - Leo Varadkar has experienced a marginal reduction in satisfaction of one percentage point to 35%.
 - Following a decrease in the previous wave and in a period where she was missing from public life, Mary Lou McDonald's satisfaction rating increased by one point to 49%.
 - Eamon Ryan's satisfaction rating has not changed and remains on 27% satisfaction rating.
 - Ivana Bacik's rating has seen a slight increase of two points to 42%.

Sunday Times/Behaviour & Attitudes Opinion Poll Series

Party Support Levels

- Sinn Féin's party support has remained steady, albeit with a marginal reduction of one percentage point to 33%. The gap between Sinn Féin and other parties has now increased to 12% percentage points. It has maintained its highest first preference vote share among those under 55 years of age. However it is the third placed party among those over 55. It remains the case that, although it is relatively less popular among middle class cohorts, it continues to have the highest share of first preference voters among this cohort (27%).
- Fine Gael support has increased by one point to 20%, yet to return to levels seen prior to the removal of the eviction ban.
- Fianna Fáil's level of support has dropped to 21% from 24% in our last poll.
- The Green Party has seen a slight increase in support to 6% (+2% pts), while the Labour Party has remained at 4%.
- Social Democrat support has increased marginally by one point to 3%.
- Other Independents have slightly decreased by 1% point to 9%.
- Overall, total Government support has been maintained at 47%. Certainly all eyes will be on the next budget, with many hoping to benefit.

Issues Question

- This wave we included a question to identify the top three issues facing the country at the moment.
- Although housing continues to dominate. House prices/Cost of Rent/ Mortgage Repayment Rates are mentioned by 51% as a specific issue, and remains a key concern for those under 35 years of age, but is prominent across all age groups.
- Health services continue to be a key concern in second place, with 45% mentioning this as a top three issue.
- And not surprisingly, with Winter around the corner, there has been a notable increase in numbers citing household bills as a concern. Although it is not yet at the level seen in October 2022 it remains in (joint) third place.
- Also joint third is the homeless situation/Lack of Local Authority Housing (42%).
- There has been a notable increase in the coverage and revulsion at crime. This has unsurprisingly, resulted in 27% mentioning crime (compared to 15% in April).
- However, clearly Housing is the most substantive emotive issue, though it is important not to lose sight of rising concerns elsewhere, especially around household bills.
