Sample Size

The results of this opinion poll are based upon a representative sample of 905 eligible Irish voters aged 18 years +.

Fieldwork

As such, the results can be deemed to be accurate to within plus or minus 3.3 percentage points at the 95% confidence level. Fieldwork was conducted on an in-home, face-to-face basis over the period 1st – 13th November, 2018.

Location

The sample was stratified across all constituencies at 125 locations in the country with individuals selected for interview by way of Demographic Quotas (age, gender, socio-economic status) in line with Central Statistics Office (CSO) and market research industry population estimates.

Technical Appendix

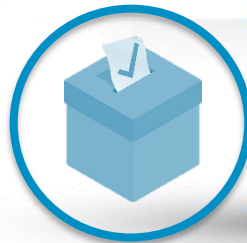

Weighting

The subsequent survey results are weighted to reflect the known demographic profile of Irish adults, utilising the most recently published census population estimates from the Central Statistics Office (CSO).

Party Support

Party support levels are subsequently realigned in accordance with a technical adjustment factor, designed to smooth the effects of extreme highs and lows in support levels for individual parties as measured at a single point in time, and taking variable election day turnout levels into account.

Guidelines

All aspects of the survey, including the Party Support adjustment factor, are implemented in accordance with the technical and ethical guidelines set down by the Association of Irish Market Research Organisations (AIMRO) and the European Society of Opinion & Market Research (ESOMAR).

Party Support Adjustment Factor: Technical Note

- Predicting election results on the basis of poll data is not an exact science. All the evidence shows that support for individual parties can swing dramatically in the period between elections- very often outside the bounds of historic election results.
- What to do in these circumstances? Most polling companies in Britain and Ireland publish their raw survey results as an index of fluctuations in the emotional mood of voters. They also build in an adjustment based on a number of factors. Where we have reports of how people voted in the last general election as well as how they intend to vote in the next one we can use these data to model the likely level of swing from the last election results.
- We then add back in the forecasts of voters who have not voted last time or do not answer that particular question.
- Finally we take into account each individuals stated likelihood of voting in a forthcoming General Election.
- This is the basis of the adjusted voting forecast in Behaviour & Attitudes polls.

Adjusted figures based on:

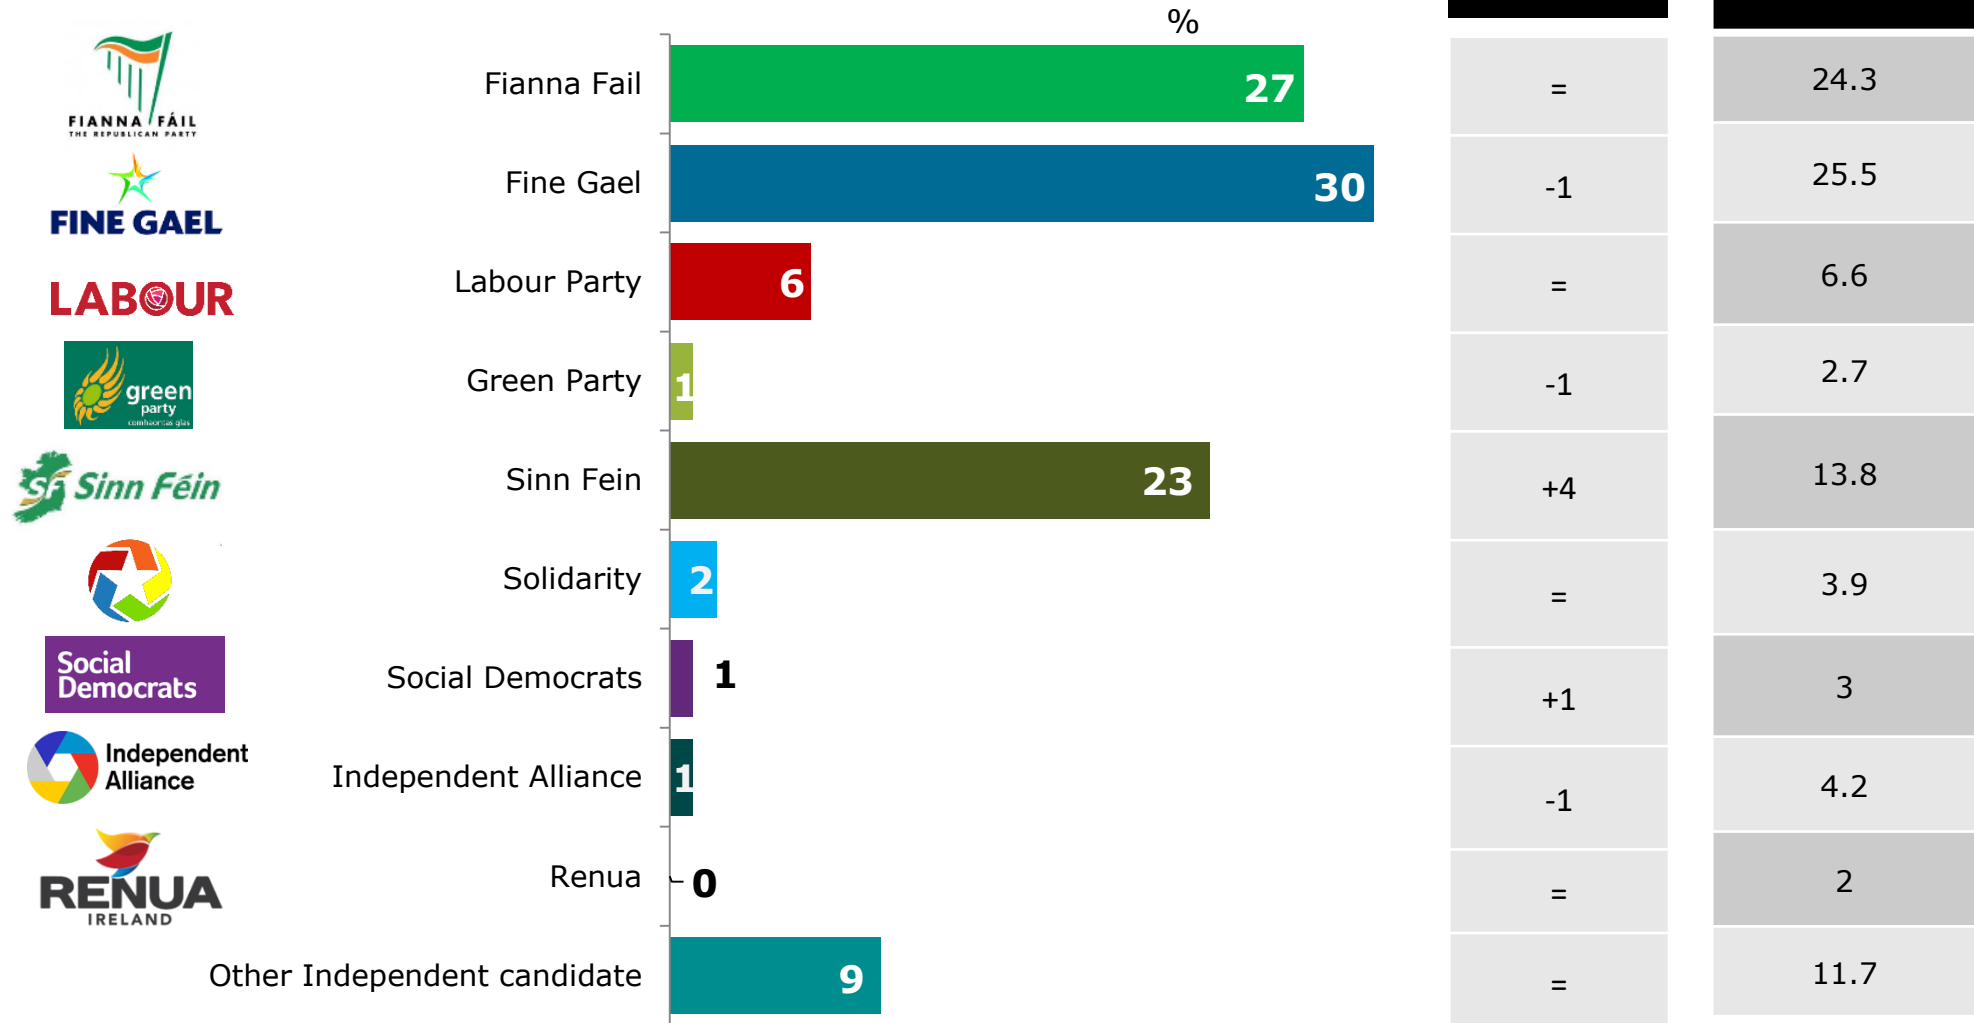

- All who state they would definitely vote
- Weighting of those respondents who give a definite answer as to who they would vote for in a general election and who they voted for in the last election, a quarter of the way between stated voting intention and the result of the last election.
- Making no adjustment to stated voting intention of those who do not indicate how they voted in last election.

Commentary

Background

Fieldwork for today's poll was conducted over the period Thursday 1st to Tuesday 13th November.

Interviewing would thus have been conducted in the direct aftermath of the Presidential Election on Saturday, 27th October.

The big shock of that Presidential Election, was, of course, a surge in support for Peter Casey, from 2% in our pre-election opinion poll to 23% in the actual election. Undoubtedly, Casey's capturing of almost a quarter of all votes cast was as a direct result of his provocative statements regarding Irish travellers, expanded upon in the latter days of the campaign by similar pronouncements regarding those citizens who rely on state support to survive.

With 6% support for Casey in the Connaught/Ulster region before his election-day surge, it is by no means beyond the realms of possibility that he could pick up a seat as an Independent in the Donegal constituency – watch this space.

It should be noted that the vast majority of fieldwork for this month's poll had been completed by the time news of a potential Brexit negotiation breakthrough had become public, and these developments will therefore have had no impact on the results of the survey.

Factors influencing respondents' opinions in today's poll are in reality more likely to have related to the continuously improving health of the economy, counterbalanced by serious concerns around the affordability of housing, management of the healthcare system, etc.

Party Support and Leader Satisfaction Levels

At an overall macro level, there are few statistically significant differences in satisfaction levels with either the Government or the leaders of the main political parties.

For example, satisfaction with the Government registers at 42% nationwide in this month's poll, compared to 41% last month. From a socio-economic demographic perspective, there is however a notable difference in Government satisfaction between urban and rural areas, with 45% of all urban dwellers (rising to 48% of those in Dublin) satisfied with the Government, compared to just 38% of all rural dwellers happy with the manner in which the country is being run.

There is clearly still a regional divide in terms of how people feel they are faring under the current administration, with a majority of individuals living outside cities and large towns unhappy with their lot.

Overall, there is little to separate the leaders of the three main parties in terms of their popularity with the electorate. Thus 49% of all voters are satisfied with the manner in which Micheál Martin is leading Fianna Fáil, compared to 48% who are happy with Leo Varadkar as Taoiseach, and 48% who are satisfied with the job Mary Lou McDonald is doing as leader of Sinn Féin.

40% are happy with Brendan Howlin as leader of the Labour party – including almost nine in ten of all core Labour Party voters.

From a party vote perspective, little has changed since October's poll, with the exception of support for Sinn Féin which has increased by four percentage points to 23% of all voters today.

Party Support and Leader Satisfaction Levels

Closer examination of the data reveals that the vast bulk of this increased support for Sinn Féin is accounted for by 35-54 year old male voters living in the Greater Dublin Area. Coupled with the fact that support for the party has increased across all socio-economic groupings, it is reasonable to assume that those moving towards Sinn Féin over the last few weeks are quite likely to turn out and vote in a general election.

In other words, Sinn Féin is gaining some traction amongst those types of individuals who tend to actually cast their vote, as opposed to sitting on the sidelines come election day as disgruntled observers.

It is, however, still the case that Fine Gael is the most popular party in the country on 30% support nationwide, followed closely by Fianna Fáil on 27%.

Support for Fine Gael is reasonably well spread across all age groups, regions and socio-economic groupings, confirming that it appeals to a broad range of voter types, and not just one or two niche groupings. The main Government party will also be pleased to note that it commands the support of just over a third of all Dublin voters – twice the level of support that Fianna Fáil currently attracts in the capital.

Meanwhile, support for Independents and smaller parties continues to slip, and stands at just 15%. With almost two-thirds of this cohort considering giving their vote to a non-aligned Independent candidate, we have further evidence of the looming collapse in the 'smaller grouping' vote in the next election, whether that be for Solidarity/PBP, the Social Democrats, or Independent Alliance.

Party Support and Leader Satisfaction Levels

Finally, the Labour Party has maintained its October showing of 6% support nationwide, and with 12% support in Dublin, the party is in with a fighting chance to at least retain its current complement of seven TDs in the next Dáil.

Irish Citizenship Entitlement Preferences

This month's social issues question related to the recent high profile case of nine year old Eric Zhi Ying Xue, who was born in Ireland to a Chinese mother and was subsequently faced with deportation from the country.

Presented with a summary of this case as a backdrop to the question, respondents were asked whether they feel that anyone born on the island of Ireland should be automatically entitled to Irish citizenship, or not.

In response, just over seven in ten of all Irish voters are of the opinion that anybody who is born on the island of Ireland should automatically be entitled to Irish citizenship.

This sentiment is most pronounced amongst voters aged 18-34 years (at 79%), those resident in Dublin (74%) and Leinster (76%), as well as amongst supporters of the Labour Party, Green Party and Sinn Féin.

A further one-fifth (19%) of all voters do not believe that being born in Ireland should automatically bestow citizenship on the child – a figure which rises to just under a quarter of those aged 35-54 years, people from an ABC1 white collar/professional working background, and those living in Connaught/Ulster.
