July Opinion Poll 2019

Prepared by Ian McShane

J.1133

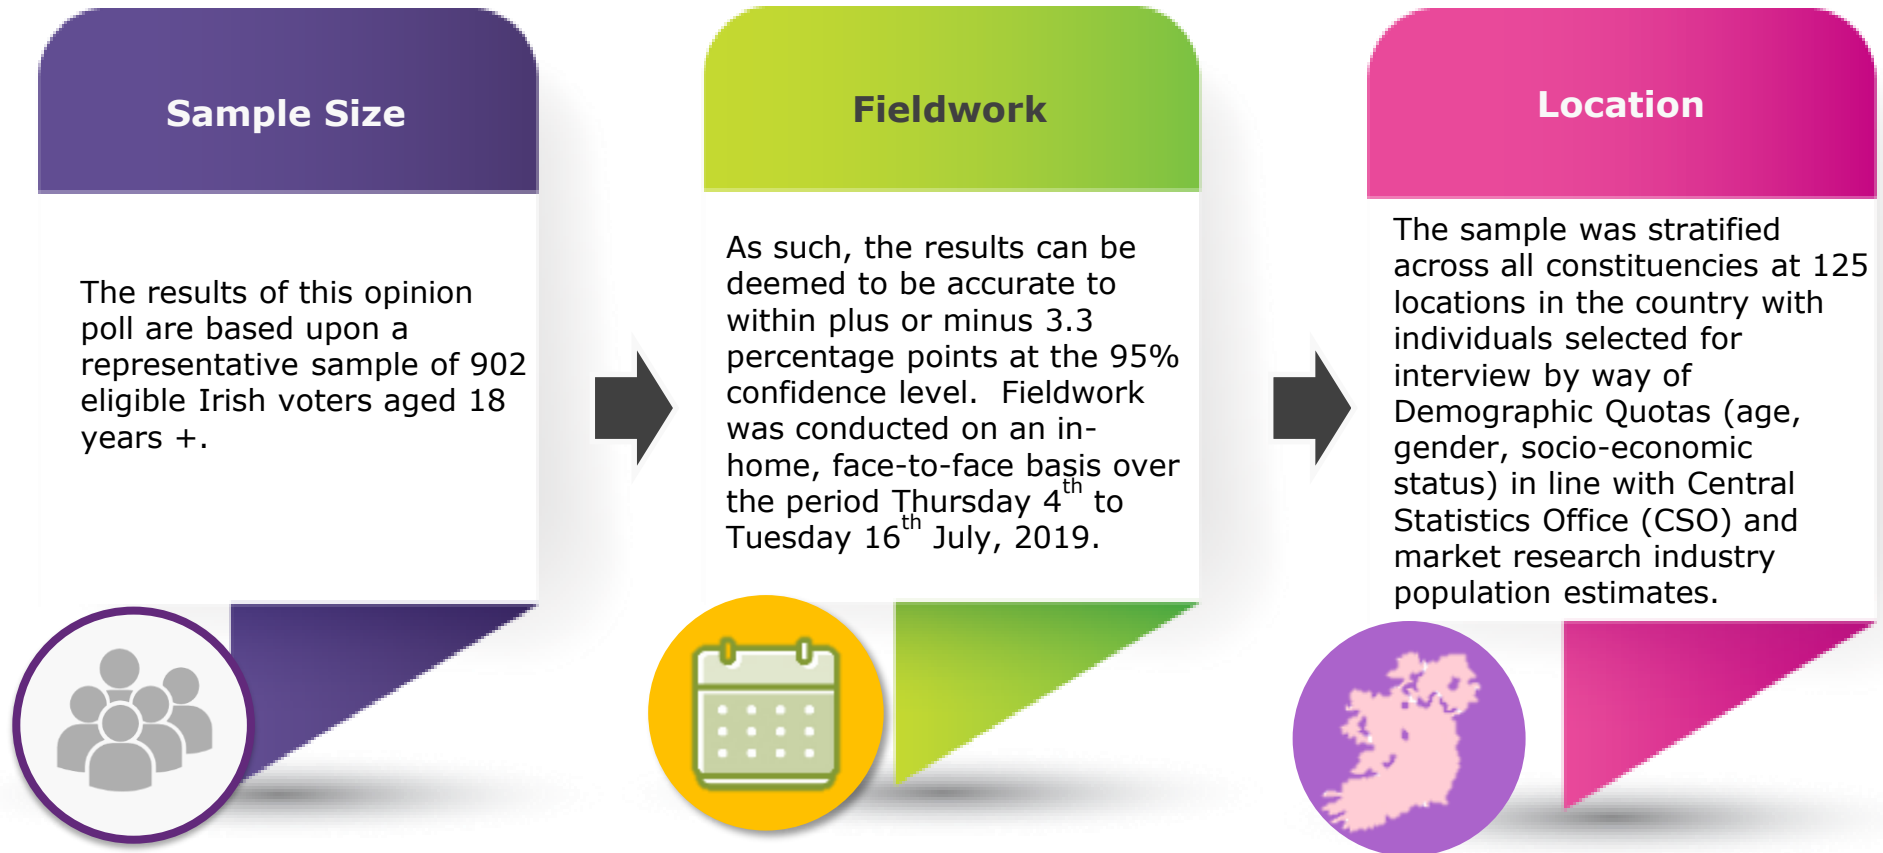

RESEARCH
& INSIGHT

Technical Appendix

Technical Appendix

Weighting

The subsequent survey results are weighted to reflect the known demographic profile of Irish adults, utilising the most recently published census population estimates from the Central Statistics Office (CSO).

Party Support

Party support levels are subsequently realigned in accordance with a technical adjustment factor, designed to smooth the effects of extreme highs and lows in support levels for individual parties as measured at a single point in time, and taking variable election day turnout levels into account.

Guidelines

All aspects of the survey, including the Party Support adjustment factor, are implemented in accordance with the technical and ethical guidelines set down by the Association of Irish Market Research Organisations (AIMRO) and the European Society of Opinion & Market Research (ESOMAR).

Charted Summary

Sunday Times/Behaviour & Attitudes Government and Party Leader Satisfaction Levels

The background of the slide features a series of thin, curved lines in shades of grey and white, creating a sense of motion and depth. A solid green rectangular box is positioned on the left side, containing the title text.

Party Support Adjustment Factor: Technical Note

- Predicting election results on the basis of poll data is not an exact science. All the evidence shows that support for individual parties can swing dramatically in the period between elections- very often outside the bounds of historic election results.
- What to do in these circumstances? Most polling companies in Britain and Ireland publish their raw survey results as an index of fluctuations in the emotional mood of voters. They also build in an adjustment based on a number of factors. Where we have reports of how people voted in the last general election as well as how they intend to vote in the next one we can use these data to model the likely level of swing from the last election results.
- We then add back in the forecasts of voters who have not voted last time or do not answer that particular question.
- Finally we take into account each individuals stated likelihood of voting in a forthcoming General Election.
- This is the basis of the adjusted voting forecast in Behaviour & Attitudes polls.

Adjusted figures based on:

- All who state they would definitely vote
- Weighting of those respondents who give a definite answer as to who they would vote for in a general election and who they voted for in the last election, a quarter of the way between stated voting intention and the result of the last election.
- Making no adjustment to stated voting intention of those who do not indicate how they voted in last election.

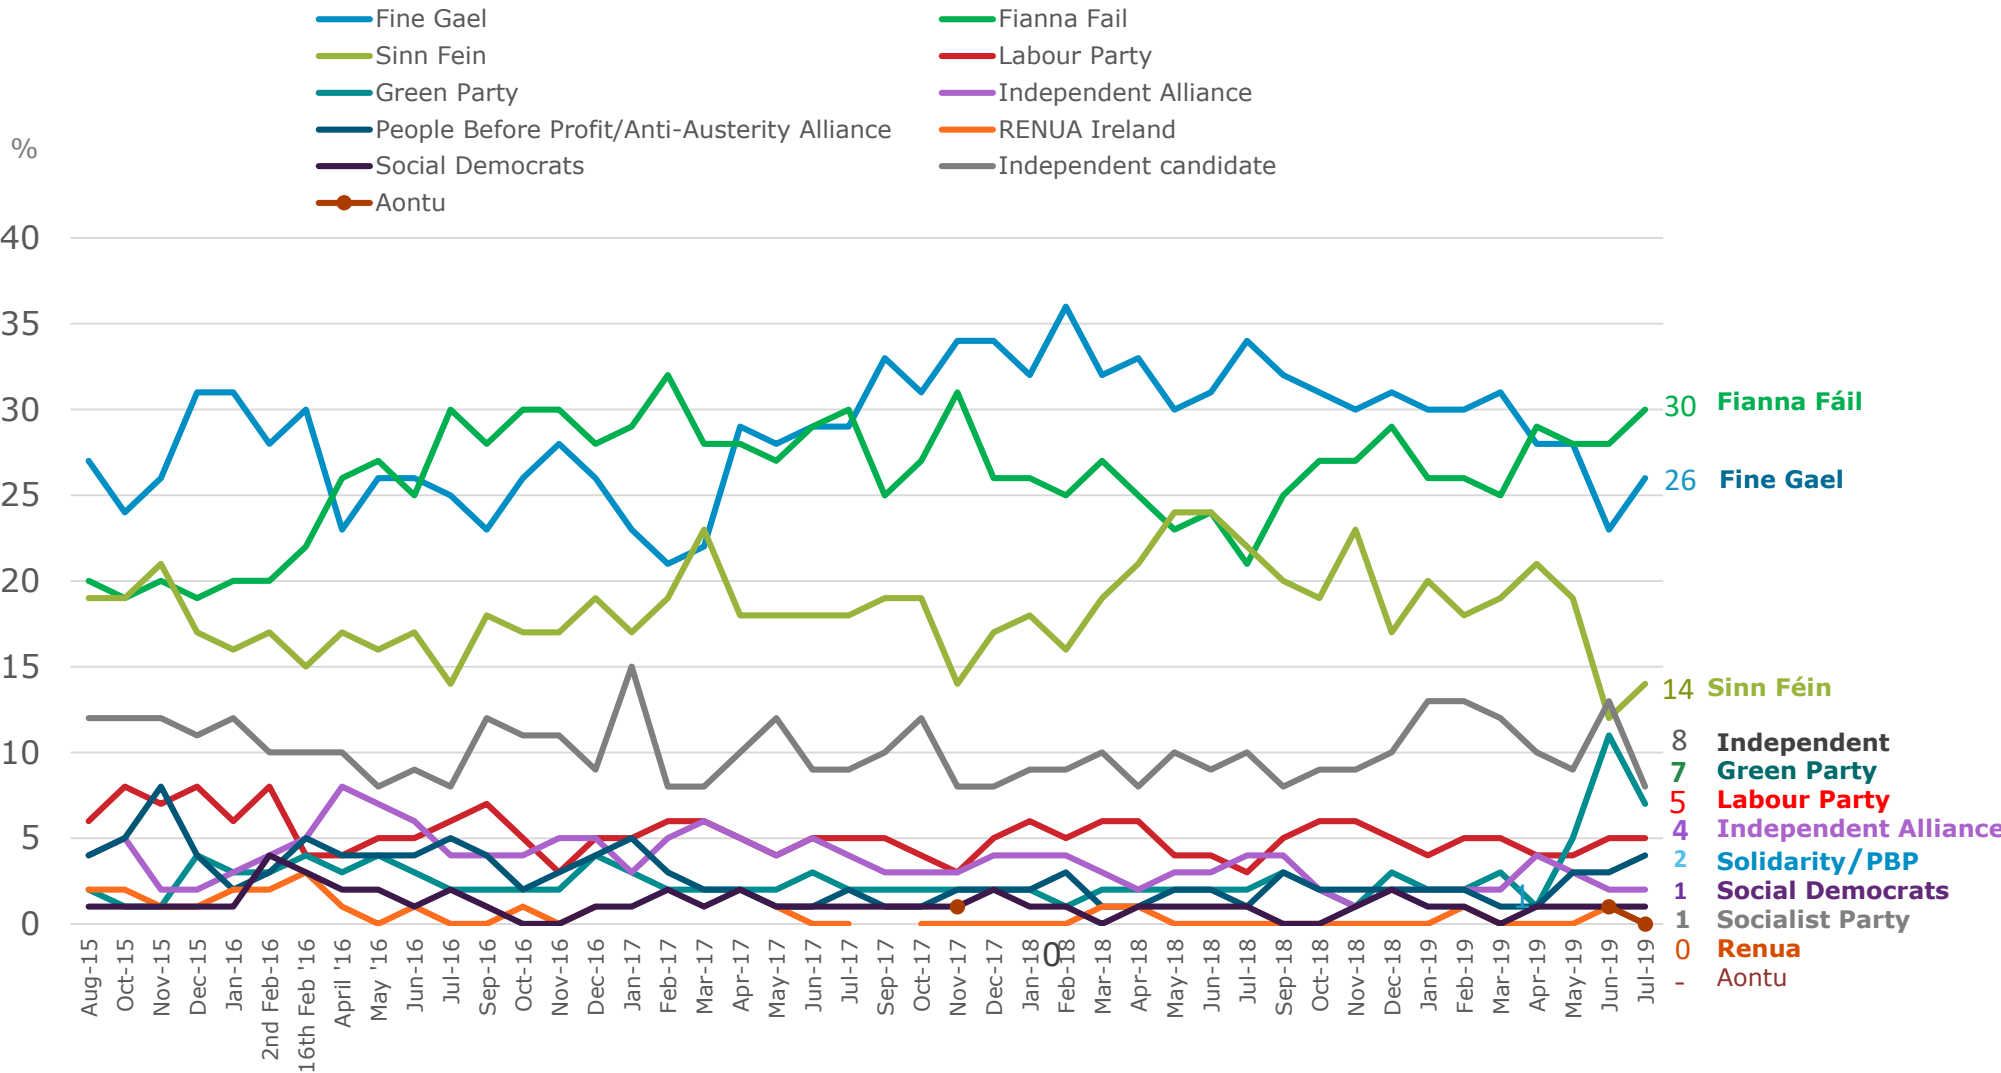

Party Support Levels - Detailed Breakdown

(excluding undecided/adjusted)

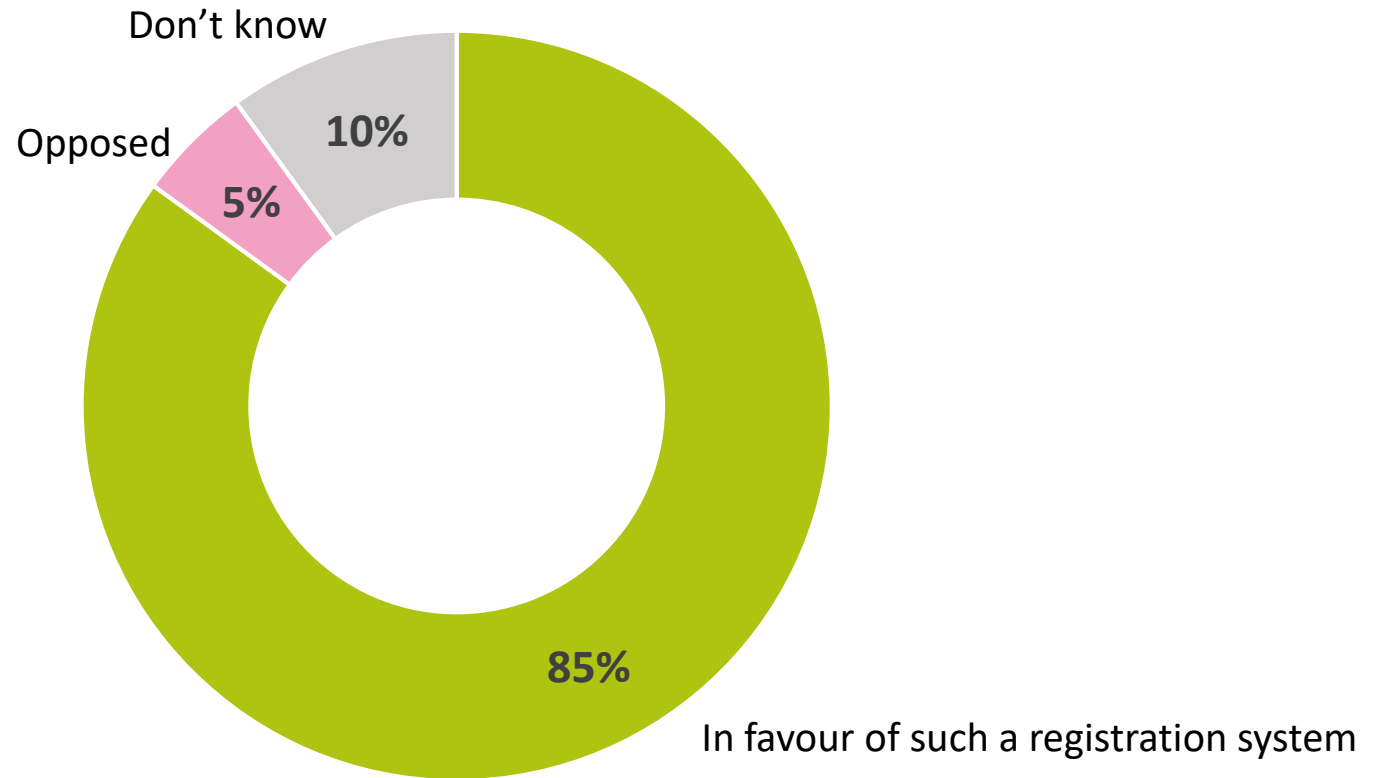

Party Support Levels - Detailed Breakdown Trend

(Excluding Undecided - Adjusted)

Attitudes towards the Introduction of an Online Safety Registration System x Demographics & Party Support

Base : All Eligible Voters - 902

Q.8 There has been much social commentary in recent years around the growth of internet pornography, and the management of people's access to it. Would you be in favour of, or opposed to, the introduction of a registration system through which adults would have to prove that they are aged 18 years or over before being allowed to access online pornography, using a credit card or ID such as a passport or driving license?

Commentary

Background

Fieldwork for today's poll was conducted over the period Thursday 4th to Tuesday 16th July, 2019.

As such, any after-effects of the local and European elections would have become apparent by the time survey fieldwork began, with most parties drawing some comfort from the outcome of those elections.

For example, Fianna Fáil have pointed to their strong performance in the local elections, setting it up nicely on the ground as planning for the general election moves to the next phase

Fine Gael , meanwhile, performed particularly well in the European elections, capturing five of the thirteen seats and 30% of the vote nationwide.

The Green Party can also draw comfort from both the local and European elections, and if it can replicate the almost 6% share of vote it won in the locals, it should be in a position to win as many as ten seats in the next Dáil.

Sinn Féin's recent drop in support resulted in a internal party review, which concluded that the party messaging around core party policies needs to be significantly sharpened if it is to recover its lost support in time for the general election.

Meanwhile, survey fieldwork coincided with the most intense phase of the British Tory party leadership race. Media coverage of the contest has suggested that the prospect of a hard Brexit, and the negative impact this would have on the Irish economy, is now more likely than ever before. As we reach the end of the current Dáil period when the politicians depart Leinster house for their summer break, all eyes will be on today's Behaviour & Attitudes/Sunday Times poll for the parties' end of term report card.

Party Support and Leader Satisfaction Levels

Last month's poll registered a stark drop in support for the government, Fine Gael, and Taoiseach Leo Varadkar. Support for Fianna Fáil had held steady with previous months' polls, Sinn Féin support had dropped significantly, and Green Party support had increased from 5% in May to 11% in June. There was certainly a sense in which that last poll represented something of a knee-jerk reaction to the results of the European and local elections, the question then being to what extent those party support levels would maintain in the longer term.

The results of today's poll do suggest that the political landscape has reverted to a more familiar pattern, with Government and party leader satisfaction more or less back to their June levels, the gap narrowing between Fianna Fáil and Fine Gael, and Sinn Féin support improving somewhat from its all-time low of last month's 12%.

Support for the Green Party has settled back from last month's exceptionally high 11% to an arguably more realisable 7%, and support for Independents and smaller parties has also declined to its more recent levels.

Party Support and Leader Satisfaction Levels

While satisfaction with the performance of the Government has increased five percentage points over the last two weeks to 39% today, it is still a fact that the majority (52%) of the electorate is dissatisfied with the administration.

Those least enamoured with the government included female voters, those aged 35-54 years and individuals from a blue collar C2DE working background. Over eight in ten Fine Gael supporters are happy with the government, with just under two-thirds of Fianna Fáil supporters unhappy.

Leo Varadkar's personal satisfaction rating as Taoiseach has increased by two percentage points since last month, and we now have 41% of the electorate satisfied with the Taoiseach, compared to 47% who are dissatisfied. There has been a statistically insignificant drop of three percentage points in Mr. Varadkar's satisfaction amongst the core Fine Gael support base and, no more than any party leader, his position at the helm of the party is rock solid until after the next general election at least.

With regard to the party leading that next government, Fine Gael will of course be relieved to see its support increase three percentage points to 26% this month, although not particularly comfortable with the fact that it still trails Fianna Fáil, which now enjoys a four point lead over Fine Gael.

Party Support and Leader Satisfaction Levels

Notwithstanding its overall positioning vis a vis Fianna Fáil it is worth noting that Fine Gael outperforms Fianna Fáil by three percentage points in Dublin, with Fine Gael, Fianna Fáil and Independents/Others each garnering 26% of first preference support across all urban areas in the country.

Support for Fianna Fáil has increased from 28% last month to 30% in July - the party's strongest performance since November 2017. Today's poll is the fourth since April of this year in which Fianna Fáil has either lead or equalled Fine Gael at a national level. Taken in tandem with its performance in the recent local elections, the trend is now pointing towards a future Fianna Fáil led coalition.

Fianna Fáil support is particularly strong amongst those aged 55 years+ (37%), and residents of rural areas where the party's 38% support outstrips its nearest rival by twelve percentage points. It is also noteworthy that Fianna Fáil is the most popular party in today's poll amongst the ABC1 white collar and professional working grouping, a cohort in which Fine Gael usually over-performs. Sinn Féin remains the third most popular party in the country and at 14% support is now level with its share of the vote in the 2016 General Election. Support for that party is highest amongst 35-54 year olds (21%), C2DE working category individuals (18%), and urban dwellers (15%).

Party Support and Leader Satisfaction Levels

As mentioned, support for the Green Party has declined since last month, albeit at 7% support in today's poll the party is within striking distance of moving into double digits in the next Dáil, and almost certainly commanding a handful of cabinet seats in the next administration. The party will be particularly pleased to note its 15% support in Dublin, and indeed the 9% support it enjoys across all urban areas combined. Based on these figures, speculation around its prospects of winning additional seats in the capital and other cities are certainly well founded.

The Labour Party meanwhile continues to languish in and around 5%, and, at that level the best it can hope to do is hold its current seats with a view to it too becoming part of the broader post-election coalition.

If the results of today's B&A poll were replicated in an actual General Election, the most likely outcome would be a Fianna Fáil led coalition incorporating the Green Party and the Labour Party, along with perhaps the Independent Alliance. The timing of that election is of course almost solely dependant on whether or not the UK leaves the EU at the end of October, and indeed whether there will untimely be a hard or soft Brexit.

Regardless of what happens on this front by Halloween, we can expect the tensions between Fianna Fáil and Fine Gael to spill over into open warfare in the final months of 2019, in advance of an early 2020 election.

Tabular Data

Q.1 Would you say you are satisfied or dissatisfied with the manner in which the Government is running the country?
